Jupiter OCS

Junosoft 聚諾
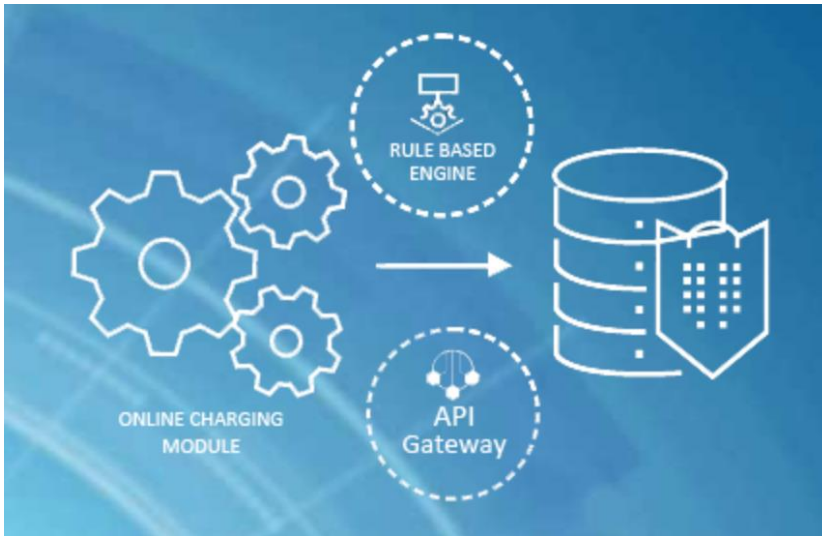

Introduction

Jupiter OCS(Online Charging System) is simplified to suit your business requirements. We have designed a system that is capable of meeting competitive service level agreements, allows for more reliable billing, minimized errors and increased efficiency.

Supporting diameter based transactions and allowing for real time tear down of data sessions, and/or calls.

InMemory database and redundant environments, ability to queue transactions and it's built in fault tolerance will give you peace of mind.

Key Benefits

✓ **Multi-charging model**
Support online and offline charging, standard engine for prepaid, postpaid and hybrid.
